

MANUAL GEAR TREATMENT

MotorSilk® Manual Gear Treatment (MSGT) is an additive designed for use in all manual transmissions, manual transaxles, gearboxes, and final drives. It contains enhanced esters and their derivatives, synthetic-base oils and a complete boron-based anti-wear formulation that significantly reduces metal-to-metal wear. It is designed to provide high-temperature stability, corrosion protection, and coating of synchros.

USAGE

MotorSilk® Manual Gear Treatment technology works with any manual transmission, gearbox or differential, when added in a 1:10 ratio (about 100ml of gear treatment per litre).

APPLICATIONS

Most manual transmissions, gear boxes and differentials. **Do not use in automatic transmissions.**

SPECIFICATIONS

API Gravity.....32-35
Flash point.....over 400°F
Viscosity at 40°C.....28-32 CS
Viscosity at 100°C.....5-7 CS
Viscosity index.....over 150

PACKAGING

Bottle.....16 oz / 473 ml
Bottle.....32 oz / 946 ml
Pail.....35 lb / 16.6 litre
Drum.....400 lb / 189.3 litre
Tote.....2000 lb / 946.0 litre
